CURRENT AND FUTURE RESERARCH

1. **Teaching** - Adopting new technology in my classes
2. **Research** - Attending academic conferences, joining professional memberships, and publishing papers.

My current research focuses specifically on the Chinese-Korean-American experiences and what factors within Korea led many generations of Chinese-Korean families to leave for a better life in America. I try to look at the circumstances surrounding Chinese-Korean immigration between 1960 and 1990, specifically focusing on South Korea. This research includes an analysis of the major economic and political changes of South Korea over the time and how these changes influence Chinese-Korean decision to migrate to the United States. In order to produce a paper on this, I am now trying to collect statistics of Chinese-Korean-Americans in California followed by a discussion of the difficulties faced by Chinese-Korean-Americans who are attempting to assimilate into American society. I am also planning to conduct interviews with Chinese-Korean-Americans.
