

**POINT**<sup>19</sup> **LOMA**<sup>02</sup>  
 NAZARENE UNIVERSITY  
 Department of Biology

**Bio2010-2; Cell Biology and Biochemistry**

4 units★

*Fall 2024*★

**Meeting days/times; (MWF 11:00AM-12:05 PM)**★

**Meeting location (Evans Hall 114)**★

**Final Exam: (Monday, Dec. 16 10:30AM-12:30PM)**★

<b>Instructor title and name:</b>	Dr. Kris Koudelka; Professor of Biology
<b>Phone:</b>	619-849-2979
<b>Email:</b>	kkoudelk@pointloma.edu
<b>Office location and hours:</b>	<p><u>Office:</u> Rohr Science 122  <u>Scheduled office hours:</u> M,W 1-2PM, Thurs 11AM-12PM  <b><i>Email me to set up an appointment. I love meeting with students and am happy to find a time that works for both of us, especially if the scheduled office hours do not work for you. Emailing me to set up an appointment will also ensure that I am not in another meeting at the time.</i></b></p>

**PLNU Mission**★ **To Teach ~ To Shape ~ To Send**

Point Loma Nazarene University exists to provide higher education in a vital Christian community where minds are engaged and challenged, character is modeled and formed, and service is an expression of faith. Being of Wesleyan heritage, we strive to be a learning community where grace is foundational, truth is pursued, and holiness is a way of life.

### **General Education Mission**✳️

PLNU provides a foundational course of study in the liberal arts informed by the life, death, and resurrection of Jesus Christ. In keeping with the Wesleyan tradition, the curriculum equips students with a broad range of knowledge and skills within and across disciplines to enrich major study, lifelong learning, and vocational service as Christ-like participants in the world's diverse societies and culture.

### **Course Description**✳️

An introduction to the principles of cell biology, molecular biology, and biochemistry. Topics include the chemical basis of life, basic membrane functions and membrane transport, basic metabolic pathways including cellular respiration and photosynthesis, cell division, and expression of the genetic material. Lecture and lab.

### **Program and Course Learning Outcomes**✳️

**Learning objectives:** *The overarching goal of this course is to prepare students for subsequent in-depth coursework in Biology, Biology-Chemistry, and health sciences.*

- 1) Understand basic principles of the inner function of cells, including how cells obtain and use energy through cellular respiration and/or photosynthesis, how membranes regulate cellular composition, how cells organize and communicate within a multicellular organism, and how genetic material is copied and converted to phenotypic information. (Program learning outcome #1)
- 2) Apply content to various scenarios in order to describe how a cell would react under changing environmental conditions, and relate problems associated with malfunctions in various important cellular processes. (Program learning outcome #1)
- 3) Evaluate current bioethical issues from an understanding of science and our moral responsibilities as Christians. (Program Learning Outcome #3)
- 4) Utilize skills and techniques critical to experimentation in a cell and molecular biology laboratory setting. (Program learning outcome #1)
- 5) Design scientific experiments with appropriate controls and analyze scientific data, demonstrating knowledge of the purpose, experimental method, data, and basic statistical interpretation. (Program learning outcome #1)
- 6) Demonstrate critical thinking skills related to scientific methods, data analysis, and conclusions. (GELO 1d; *Critical Thinking: Students will be able to examine, critique, and synthesize information in order to arrive at reasoned conclusions*).

### **General Education Learning Outcomes**✳️

- 1) Demonstrate critical thinking skills related to scientific methods, data analysis, and conclusions. (GELO 1d; *Critical Thinking: Students will be able to examine, critique, and synthesize information in order to arrive at reasoned conclusions; assessed by questions embedded within exams throughout with final assessment included in the final exam*).
- 2) Link GE courses and corresponding GELO's: <https://assessment.pointloma.edu/academic-assessment/general-education/assessment-plan/>

## Required Texts and Resources\*

1. Campbell (coauthors: Urry, Cain, Wasserman, Minorsky); Biology in Focus, 3<sup>rd</sup> Edition; Copyright 2020. Pearson
2. Students will also need access to the online learning platform “mastering biology”.
  1. Packages purchased through the PLNU bookstore or directly at Pearson
3. Lab Manual; purchased through the campus bookstore or directly through Cognella ([orders@cognella.com](mailto:orders@cognella.com)); ~\$27
4. iClicker for class participation (this will be used for many classes; you only need to purchase 1)

*You only need to purchase the textbook (eText and/or looseleaf) and mastering biology once. The bookstore will list several options. You do not need all of these as these are just different options for different student needs.*

## COURSE CREDIT HOUR INFORMATION ☼

In the interest of providing sufficient time to accomplish the stated Course Learning Outcomes, this class meets the PLNU credit hour policy for a 4-unit class delivered over 15 weeks. It is anticipated that students will spend a minimum of 37.5 participation hours per credit hour on their coursework. For this course, students will spend an estimated 150 total hours meeting the course learning outcomes. The time estimations are provided in the Canvas modules.

## Evaluation and grading ☼:

### Point breakdown (tentative; may be altered slightly)

3 Midterm Exams	39%
1 Final Exam	17%
Mastering Biology assignments	17%
Team Based Learning	7%
Laboratory grade	20%
<hr/>	
TOTAL	100%

### Approximate grade breakdown

	93-100% = A	90-93% = A-
87-90% = B+	83-87% = B	80-83% = B-
77-80% = C+	73-77% = C	70-73% = C-
67-70% = D+	63-67% = D	60-63% = D-
≤ 59% = F		

1. A minimum grade of C in this course is required to advance to Genetics. (A grade of C- (C minus) or lower is not acceptable for advancement to Genetics.)

2. Freshmen earning an F will be offered the opportunity to retake a course once, with the new grade completely replacing the F.

### **Final Examination Policy**⊕

Successful completion of this class requires taking the final examination on its scheduled day. The final examination schedule is posted on the [Class Schedules](#) site. If you find yourself scheduled for three (3) or more final examinations on the same day, you are authorized to contact each professor to arrange a different time for one of those exams. However, unless you have three (3) or more exams on the same day, no requests for alternative final examinations will be granted.

**Exams** – There will be 3 midterms (~100 pts each) and a final exam (~160 pts). Each exam will consist of multiple choice and short answer questions and/or calculation problems. All of science is cumulative such that scientific knowledge must build and expand upon previous knowledge. The same is true when learning science, you must remember and apply all that you have previously learned in order to completely understand and apply newer material. Thus, although the focus of each midterm will be on recent material, each should be thought of as a cumulative exam.

**If you have a conflict with an exam date/time, you must let the instructor know well in advance.** Makeup exams will be at the discretion of the instructor. **The final exam must be taken at the scheduled place and time.**

**Mastering Biology:** -- Homework will include mastering biology pre-class and post-chapter assignments. Late work will lose 10% per day up to 1 week late (3 classes) at which point a 0 will be given.

**Mastering biology pre-class assignments 5 pts each** – You will be expected to complete the chapter reading and a short pre-class assignment (~30 minutes) prior to the start of that week's chapter. This will help you be prepared to participate in class and to learn together as we address the more difficult parts of the chapter and work together in class to practice the learning objectives. Many of these contain short videos to view before answering questions. You are strongly encouraged to carefully watch all videos, taking notes along the way.

**Mastering biology Chapter review assignments 10 pts each** – After we have completed each chapter together, you will be assigned a more comprehensive set of questions designed to help you practice thinking about and applying what you have learned. These questions more reflect the type of knowledge and questions that you can expect to see on the exams.

**Reading guides (extra credit)** - The textbook is a very helpful resource for you and we want to encourage you to read prior to coming to class, and to read the textbook in a manner that

helps you understand the major content and concepts, be able to explain key figures, and prepare / study for the exams. We encourage you to use and fill out the reading guide when you are reading the text prior to class, and then go back after to revise, expand, and fix any areas. You can think of this as a study guide to be used before and after class. The learning objectives at the back of each reading guide can be considered a pseudo-study guide. ***If you complete all of the reading guides for a given exam and submit (with obvious effort and completeness), you will be awarded 5 extra credit points applied directly to the exam.***

**Team based learning activities (100 points – 5 events)** - Team based learning allows students to use and apply course concepts. Application of foundation knowledge is important to all sciences, and is a critical skill for every person regardless of field. We will have 5 team-based learning events this semester. Each event will consist of an individual pre-quiz, a group version of the same quiz, an additional activity, and a peer evaluation questionnaire. Points will be awarded for the individual quiz, for the group quiz, and for the peer questionnaire.

Individual pre-quizzes = 30 points

Group quizzes = 30 points

Peer evaluation questionnaire = 40 points

**Laboratory experience** – An essential part of any science curriculum is hands-on experience in the lab. The Bio2010 lab is designed to expose the student to some of the essential tools of the scientist in a safe, controlled environment. Please see the separate lab syllabus for details. ***Lab does not meet during the first week of classes.***

***\*\*Lab reports will be taught and assessed as part of GELO1a, 1d, and 1e)***

**Class participation** - Class attendance and participation will be based on iClicker participation, attitude, and preparation / contribution in peer teaching and group work. I require **iclickers** and have questions throughout the course that are answered by iclicker. **Generally I am looking for thought and participation, not whether or not you answered the question correctly. Everyone must have their own Iclicker and it must be registered with your student ID number.** Bring your iClicker to class each day.

Available in the bookstore or online: <http://www.iclicker.com/Products/iclicker2/>

### **Tips for reading a textbook:**

- Keep the big picture in mind. Before reading, look at chapter organization. Read the subheadings and get a feel for the breadth and arrangement of topics covered.
- Go over the figures and special topics sections very closely. Be sure you can explain the “take-home message” and main ideas of each. These are critical to understanding biology and should not be considered “pages to skip”.
- Highlight words, phrases, and statements you know you will want to find again.

- Write comments to yourself that will help you study the material later.
- When you've finished a chapter, sometime before the exam, create a study guide that outlines the contents. This can then serve as a checklist for future studying.
- Your book has online materials that are very useful to help you learn; animations, videos, practice tests and quizzes, etc. Use these online resources.

### **Spiritual Care\***

Please be aware PLNU strives to be a place where you grow as whole persons. To this end, we provide resources for our students to encounter God and grow in their Christian faith.

If students have questions, a desire to meet with the chaplain or have prayer requests you can contact your professor or the [Office of Spiritual Life and Formation](#).

### **PLNU Copyright Policy**⊕

Point Loma Nazarene University, as a non-profit educational institution, is entitled by law to use materials protected by the US Copyright Act for classroom education. Any use of those materials outside the class may violate the law.

### **State Authorization**⊕

State authorization is a formal determination by a state that Point Loma Nazarene University is approved to conduct activities regulated by that state. In certain states outside California, Point Loma Nazarene University is not authorized to enroll online (distance education) students. If a student moves to another state after admission to the program and/or enrollment in an online course, continuation within the program and/or course will depend on whether Point Loma Nazarene University is authorized to offer distance education courses in that state. It is the student's responsibility to notify the institution of any change in his or her physical location. Refer to the map on [State Authorization](#) to view which states allow online (distance education) outside of California.

### **PLNU Recording Notification**⊕

In order to enhance the learning experience, please be advised that this course may be recorded by the professor for educational purposes, and access to these recordings will be limited to enrolled students and authorized personnel.

Note that all recordings are subject to copyright protection. Any unauthorized distribution or publication of these recordings without written approval from the University (refer to the Dean) is strictly prohibited.

## **PLNU Academic Honesty Policy**⊕

Students should demonstrate academic honesty by doing original work and by giving appropriate credit to the ideas of others. Academic dishonesty is the act of presenting information, ideas, and/or concepts as one's own when in reality they are the results of another person's creativity and effort. A faculty member who believes a situation involving academic dishonesty has been detected may assign a failing grade for that assignment or examination, or, depending on the seriousness of the offense, for the course. For all student appeals, faculty and students should follow the procedures outlined in the University Catalog. See [Academic Policies](#) for definitions of kinds of academic dishonesty and for further policy information.

## **Artificial Intelligence (AI) Policy\***

You are allowed to use Artificial Intelligence (AI) tools (e.g., ChatGPT, Gemini Pro 1.5, GrammarlyGo, Perplexity, etc) to generate ideas, but you are not allowed to use AI tools to generate content (text, video, audio, images) that will end up in any work submitted to be graded for this course. If you have any doubts about using AI, please gain permission from the instructor.

## **PLNU Academic Accommodations Policy**⊕

PLNU is committed to providing equal opportunity for participation in all its programs, services, and activities in accordance with the Americans with Disabilities Act (ADA). Students with disabilities may request course-related accommodations by contacting the Educational Access Center (EAC), located in the Bond Academic Center ([EAC@pointloma.edu](mailto:EAC@pointloma.edu) or 619-849-2486). Once a student's eligibility for an accommodation has been determined, the EAC will work with the student to create an Accommodation Plan (AP) that outlines allowed accommodations. The EAC makes accommodations available to professors at the student's request.

PLNU highly recommends that students speak with their professors during the first two weeks of each semester/term about the implementation of their AP in that particular course. Accommodations are not retroactive so clarifying with the professor at the outset is one of the best ways to promote positive academic outcomes.

Students who need accommodations for a disability should contact the EAC as early as possible (i.e., ideally before the beginning of the semester) to assure appropriate accommodations can be provided. It is the student's responsibility to make the first contact with the EAC. Students cannot assume that because they had accommodations in the past, their eligibility at PLNU is automatic. All determinations at PLNU must go through the EAC process. This is to protect the privacy of students with disabilities who may not want to disclose this information and are not asking for any special accommodations.

## **Language and Belonging\***

Point Loma Nazarene University faculty are committed to helping create a safe and hospitable learning environment for all students. As Christian scholars we are keenly aware of the power of language and believe in treating others with dignity. As such, it is important that our language be equitable, inclusive, and prejudice free. Inclusive/Bias-free language is the standard outlined by all major academic style guides, including MLA, APA, and Chicago, and it is the expected norm in university-level work. Good writing and speaking do not use unsubstantiated or irrelevant generalizations about personal qualities such as age, disability, economic class, ethnicity, marital status, parentage, political or religious beliefs, race, gender, sex, or sexual orientation. Inclusive language also avoids using stereotypes or terminology that demeans persons or groups based on age, disability, class, ethnicity, gender, race, language, or national origin. Respectful use of language is particularly important when referring to those outside of the religious and lifestyle commitments of those in the PLNU community. By working toward precision and clarity of language, we mark ourselves as serious and respectful scholars, and we model the Christ-like quality of hospitality.

If you (or someone you know) have experienced a bias incident regarding language, you can find more information on reporting and resources at [www.pointloma.edu/bias](http://www.pointloma.edu/bias).

## **Sexual Misconduct and Discrimination\***

In support of a safe learning environment, if you (or someone you know) have experienced any form of sexual discrimination or misconduct, including sexual assault, dating or domestic violence, or stalking, know that accommodations and resources are available through the Title IX Office at [pointloma.edu/Title-IX](http://pointloma.edu/Title-IX). Please be aware that under Title IX of the Education Amendments of 1972, faculty and staff are required to disclose information about such misconduct to the Title IX Office.

If you wish to speak to a confidential employee who does not have this reporting responsibility, you can contact Counseling Services at [counselingservices@pointloma.edu](mailto:counselingservices@pointloma.edu) or find a list of campus pastors at [pointloma.edu/title-ix](http://pointloma.edu/title-ix).

## **PLNU Attendance and Participation Policy**⊕

Regular and punctual attendance at all class sessions is considered essential to optimum academic achievement. If the student is absent for more than 10 percent of class sessions, the faculty member will issue a written warning of de-enrollment. If the absences exceed 20 percent, the student may be de-enrolled without notice until the university drop date or, after that date, receive an "F" grade.
