Point Loma Nazarene University

School of STEM

CIT 3064 Web Design & Scripting

Summer 2026 - Hybrid (4 Credit Hours)

Time:	Wednesday Evenings 6:00pm – 10:00pm
Place:	Miracosta College, OC4803A
Final Exam:	July 1, 2026 NOTE: Students must earn 50% or more on the final exam and 60% of the total points in the class to pass the course

Instructor:	Sam Ovando
Office	On-line
Office Hours:	Best way to reach me is to email me at my PLNU email address. I will be monitoring it regularly and will respond as soon as possible. Sign-up for a 30 Minute Help Session at the following link: • Sign-up for a 30 Minute Help Session  (https://calendar.app.google/TtLfgn81XsVa4FZv8)
How to contact me:	sovando@pointloma.edu

Students are welcome to contact me via e-mail and schedule an appointment at any time as I am available. Appointments can be face-to-face, on the phone, or via a video conference call.

Text: (Note: The print copy of the textbook for this course is lent to the students for the duration of the course. Students will be charged if the textbook is not returned at the end of the course.)

HTML5 and CCS3 Comprehensive, 8e

Patrick Carey

ISBN: 978-0-357-10714-0

Needed Supplies:

Access to a laptop computer that runs Windows OS or MacOS with at least 8Gb of RAM and 50Gb of free storage space, standard office software, and the ability to install software on your computer. You are required to bring your computer to class to more easily start in class assignments. You should bring your textbook to each class sessions. We will be using information from the textbook each week as part of in-class assignments. Students will need to be able to download and install Microsoft Visual Studio Code onto their laptop to complete homework and in-class activities.

Catalog Description:

This course is designed to provide in-depth, hands-on instruction in designing and scripting Web sites using HTML5 and CSS3 standards. Techniques in page layout and graphic design will be introduced. Assignments will focus on the hands-on use of modern web development practices using integrated development environments. In addition, the course will introduce popular website development and content management tools such as WordPress to show alternative development approaches to HTML5 and CCS3.

Course Learning Outcomes:

1. Students will be able to create the structure of an HTML document and use HTML element properties.
2. Students will be able to use style sheets to apply HTML-consistent text and font styles.
3. Students will be able to use standard grid layouts to format HTML documents.
4. Students will be able to use relative and absolute positioning of HTML elements.
5. Students will be able to create HTML documents with background images, text shadows and 2D to 3D transformation.
6. Students will be able to design HTML pages for mobile web.
7. Students will be able to create HTML documents utilizing table and column elements.
8. Students will be able to design HTML documents utilizing web forms.
9. Students will be able to create HTML documents with advanced audio and video elements.

10. Students will be able to apply basic JavaScript programming to HTML documents.

Program Learning Outcomes:

Graduates will have a coherent and broad-based knowledge of the discipline of Computer Information Technology.

1. Students will be able to identify and evaluate information technology infrastructure necessary to meet an organization's business needs.
2. Students will be able to develop, plan and evaluate appropriate processes for managing information systems and information technology projects.
3. Students will be able to design, develop, and evaluate software solutions to meet an organization's business needs.
4. Students will be able to apply their technical knowledge to solve problems.
5. Students will be able to speak about their work with precision, clarity and organization (Oral Communication).
6. Students will be able to write about their work with precision, clarity and organization (Written Communication).
7. Students will collaborate effectively in teams.
8. Students will be able to identify, locate, evaluate, and effectively and responsibly use and cite information for the task at hand (Information Literacy).
9. Students will be able to gather relevant information, examine information and form a conclusion based on that information (Critical Thinking).
10. Students will be able to understand and create arguments supported by quantitative evidence, and they can clearly communicate those arguments in a variety of formats (Quantitative Reasoning).
11. Students will understand the professional, ethical, legal, security and social issues and responsibilities with the implementation and use of information technology.
12. Computer Information Technology graduates will be adequately prepared for entry into graduate school or jobs in the computing profession.

Course Organization:

Reading: The assigned reading each week should be completed before class. Lecture, class discussion and class activities will be based on the assumption that the reading has been completed before the class of a given week.

Chapter Practice Quizzes: Quizzes are open book and will focus on having read and understood the reading assignment. Quizzes will be taken online using Canvas before class and will be available a week before they are due. Each quiz will have 10 questions and students will have 8 minutes to complete the quiz. Each quiz is due before we discuss the topic in class. This is to encourage students to complete the reading prior to class discussion. Missed quizzes will receive zero points and there will be no make-up for missed quizzes. Quiz questions are randomly pulled from a large dataset and students are able to take the quiz as many time as they would like before the quiz due date and time. Only the latest quiz score will be recorded.

Tutorial Assignment: Each week, students will complete and submit a hands-on tutorial assignment found throughout the chapter before the start of class for each chapter read. This assignment will have step-by-step instructions and will reinforce the concepts presented in the chapter.

Weekly Review and Case Assignments: Each week, students will be assigned a chapter review and a chapter case problem from each chapter that will be started during class time and then completed before the next class session.

Final Fan Site Assignment: Students will complete a fan website on any topic the student would like, such as a sports team, technology, location, or person. The fan site will include concepts covered throughout the course and will demonstrate the student's understanding of each of these topics. The final version of the fan site will be submitted before the last class session and be presented in class.

Exams: A final exam will be given in class. The final exam will cover all material throughout the course. The exams will be closed book and closed note and will include multiple choice, short answer, and problem-solving questions. **If you will miss an exam for a school function, you must make arrangements to take it in advance. If you ever miss an exam without giving the instructor prior notice, there is a good chance you will receive a zero unless, of course, there was clearly an emergency. Exams in the course must be taken using the host operating system. Taking the exam using a Virtual Machine is prohibited unless instructed by the course instructor.**

E-mail and Messages:

Students are expected to regularly use their PLNU e-mail. The instructor will periodically send you information and updates via e-mail and/or canvas. Students must activate their PLNU e-mail account a week prior to the first class session if they are not currently using it.

Activity Point Distribution:

Activity	Points	Percent
Welcome Activities	80	7%
Weekly Questions	30	3%
Reading Quizzes	100	9%

Tutorial Assignment	200	19%
Weekly Review and Case Assignments	400	37%
Fan Website	160	14%
Final Exam	120	11%
Total	1090	100%

Grading Scale in Percentage:

A	92 - 100%	C	72 - 76.9%
A-	90 - 91.9%	C-	70 - 71.9%
B+	87 - 89.9%	D+	67 - 69.9%
B	82 - 86.9%	D	62 - 66.9%
B-	80 - 81.9%	D-	60 - 61.9%
C+	77 - 79.9%	F	0 - 59.9%

Credit Hour Information: Distribution of Student Learning Hours

In the interest of providing sufficient time to accomplish the stated course learning outcomes, this class meets the PLNU credit hour policy for a 4-unit class delivered over 8 weeks. Specific details about how the class meets the credit hour requirements can be provided upon request. It is anticipated that you will spend a minimum of 37.5 participation hours per credit hour in your course. The estimated time expectations for this course are shown below:

Activity	Hours
----------	-------

Reading and Online Quizzes (3 hours per chapter)	30
Tutorial Assignments (2.5 hours per chapter)	25
In-Class Discussion and Activities	28
Weekly Assignments (4 hours per chapter)	40
Fan Page	22
Exams Preparation	5
TOTAL	150

Late Homework/Classwork:

Reading Quizzes are not accepted late. If you fail to take the reading quiz before the due date/time, you will receive a zero for the quiz. Other assignments can be submitted late but will receive a 10% point deduction for each day late (24-hour period after the due date/time). Late assignments will not be accepted more than four days late. No assignment will be accepted after the last day of class.

University Mission:

To Teach ~ To Shape ~ To Send

Point Loma Nazarene University exists to provide higher education in a vital Christian community where minds are engaged and challenged, character is modeled and formed, and service becomes an expression of faith. Being of Wesleyan heritage, we aspire to be a learning community where grace is foundational, truth is pursued, and holiness is a way of life.

Institutional Learning Outcomes:

1. Learning, Informed by our Faith in Christ - Students will acquire knowledge of human cultures and the physical and natural world while developing skills and habits of the mind that foster lifelong learning.
2. Growing, In a Christ-Centered Faith Community - Students will develop a deeper and more informed understanding of others as they negotiate complex professional, environmental and social contexts.
3. Serving, In a Context of Christian Faith - Students will serve locally and/or globally in vocational and social settings.

Department Mission:

The Mathematical, Information, and Computer Sciences department at Point Loma Nazarene University is committed to maintaining a curriculum that provides its students with the tools to be productive, the passion to continue learning, and Christian perspectives to provide a basis for making sound value judgments.

PLNU Attendance and Participation Policy:

Attendance is expected at each class session. In the event of an absence you are responsible for the material covered in class and the assignments given that day.

Regular and punctual attendance at all synchronous class sessions is considered essential to optimum academic achievement. If the student is absent for more than 10 percent of class sessions (virtual or face-to-face), the faculty member will issue a written warning of de-enrollment. If the absences exceed 20 percent, the student may be de-enrolled without notice until the university drop date or, after that date, receive the appropriate grade for their work and participation. In some courses, a portion of the credit hour content will be delivered asynchronously and attendance will be determined by submitting the assignments by the posted due dates. See Academic Policies in the Graduate and Professional Studies Catalog. If absences exceed these limits but are due to university excused health issues, an exception will be granted.

For example: In a four-unit 8-week hybrid course, a student may be de-enrolled after missing five hours of synchronous class time (counting the first week's activities as four hours if assignments are not submitted).

Class Enrollment:

It is the student's responsibility to maintain his/her class schedule. Should the need arise to drop this course (personal emergencies, poor performance, etc.), the student has the responsibility to follow through (provided the drop date meets the stated calendar deadline established by the university), not the instructor. Simply ceasing to attend this course or failing to follow through to arrange for a change of registration (drop/add) may easily result in a grade of F on the official transcript.

Academic Accommodations:

PLNU is committed to providing equal opportunity for participation in all its programs, services, and activities in accordance with the Americans with Disabilities Act (ADA). Students with disabilities may request course-related accommodations by contacting the Educational Access Center (EAC), located in the Bond Academic Center (EAC@pointloma.edu (<mailto:EAC@pointloma.edu>) or 619-849-2486). Once a student's eligibility for an accommodation has been determined, the EAC will work with the student to create an Accommodation Plan (AP) that outlines allowed accommodations. The EAC makes accommodations available to professors at the student's request.

PLNU highly recommends that students speak with their professors during the first two weeks of each semester/term about the implementation of their AP in that particular course. Accommodations are not retroactive so clarifying with the professor at the outset is one of the best ways to promote positive academic outcomes.

Students who need accommodations for a disability should contact the EAC as early as possible (i.e., ideally before the beginning of the semester) to assure appropriate accommodations can be provided. It is the student's responsibility to make the first contact with the EAC. Students cannot assume that because they had accommodations in the past, their eligibility at PLNU is automatic. All determinations at PLNU must go through the EAC process. This is to protect the privacy of students with disabilities who may not want to disclose this information and are not asking for any special accommodations.

Artificial Intelligence (AI) Policy:

You are allowed to use Artificial Intelligence (AI) tools (e.g, ChatGPT, iA Writer, Marmot, Botowski) to generate ideas, but you are not allowed to use AI tools to generate content (text, video, audio, images) that will end up in any work submitted to be graded for this course unless explicitly called for in the assignment instructions. If you have any doubts about using AI, please gain permission from the instructor.

E-mail and Messages:

It is expected that students regularly use e-mail. The instructor will periodically send you information and updates via e-mail and/or via canvas. In the first week of class you must activate your PLNU e-mail account if you are not currently using it. Please send questions about specific problems or course details to the instructor by posting them in Canvas so that all members of the class can see the response.
